

Slalom Kayak Laminates

Slalom kayaks designed by Warwick Draper

Carbon / Kevlar foam core

Manufactured under vacuum and consisting of full layers of Carbon, Kevlar and Carbon / Kevlar with a foam core this is the stiffest and lightest of our laminates designed for elite paddlers who want the ultimate in race boat performance. Each kayak comes complete with aluminium footrests and weighs approximately 8.5kg.

Price \$2700AUD + GST

Carbon / Kevlar

Carbon / Kevlar kayaks are appropriate for mid-high level paddlers who want stiffness and performance and great value for money. This hand laminated construction consists of full layers of Carbon, Kevlar and Carbon / Kevlar with extra carbon reinforcing to create stiffness and durability. Each kayak comes complete with aluminium footrests and weighs approximately 9kg.

Price \$2200AUD +GST

Kevlar

Kevlar kayaks are ideal for clubs or individuals wanting a durable yet affordable kayak. These kayaks are hand laminated from several layers of fibreglass and heavy duty kevlar with extra reinforcing in key areas to create stiffness and durability.. Weight of the completed kayak and aluminium footrests is approximately 9.5kg.

Price \$1700AUD + GST

Notes:

All kayaks come with a clear finish hull and choice of single or two colour spray fade deck.

Each kayak comes complete with pillar foam, choice of small or large seat, bow and stern loops fitted and kevlar outside seam (full length on hand laminated kayaks and nose and tail only on Elite laminate option)

Prices do not include Freight or Import Duties or Taxes at the Destination end.

Prices effective November 1st 2008 and subject to change.

Wholesale prices are only available to recognised Kayaks Plus Dealers outside of Australia.
